

MARITIME SOFTWARE

Data smart fleet management and operations with ShipManager™ and Navigator™

DNV offers the most complete and user-friendly solutions for data smart fleet management and operations. Our maritime software is used by 300 shipping companies with more than 7000 vessels. We offer unsurpassed investment security and a local presence in more than 100 countries.

DNV offers the most complete and user-friendly solutions for data smart fleet management and operations. Our maritime software is used by 300 shipping companies with more than 7000 vessels. We offer unsurpassed investment security and a local presence in more than 100 countries.

Our ShipManager solutions support all core ship management activities such as technical management, procurement and stock control, IHM management, QHSE, crewing, hull integrity management and dry-docking tender management. In addition, we deliver the powerful business intelligence solution Ship-Manager Analyzer, which gives unique insight for identifying and tracking fleetwide improvement measures based on data from the ShipManager suite. Having one centralized and integrated fleet management system improves the transparency and puts you in a better position to make qualified decisions.

ShipManager customers give us feedback that the system allows them to increase efficiency and cut costs even more than they had expected prior to implementation.

Best practice implementation support

A ship management system implementation involves capturing and migration data from many sources, and it is crucial to have

access to domain expertise and best practice from previous implementations to secure the value of your data and to achieve success.

Navigator is designed to increase efficiency of port clearance with focus on reducing paperwork and improving efficiency of all reporting needed during a voyage.

Key features of the dry-dock projects software:

- Increase safety and compliance of your vessels
- Increase transparency of operations
- Show stakeholders that your fleet is well managed
- Analyse and optimize ship management and operational cost
- Increase productivity of your key staff
- Reduce delays, off-hire and detentions
- Reduce dry docking times and cost
- Professional software implementation support
- Data migration and capturing services from previous systems
- Investment security through partnership with DNV

With DNV you can manage your vessels in a safer and more efficient way. We offer easy-to-use solutions with high-quality implementation, proven hosting services and 24/7 support.

MARITIME SOFTWARE OVERVIEW

Our ShipManager fleet management solutions enable improved transparency and efficiency, supporting management of vessels and fleets in all technical, operational and compliance aspects. For ship operations we offer Navigator solutions for streamlined port clearance, safety and compliance.

SHIP MANAGEMENT

ShipManager Analyzer

Our powerful business intelligence solution for fleetwide KPI analysis automatically extracts data from the underlying modules, enables automated reporting and gives unique operational insight for qualified decisions, improvement measures and cost savings.

ShipManager Technical

Centrally managed maintenance system for fleetwide technical asset management supporting different maintenance strategies

ShipManager Procurement

Complete procurement solution supporting the supply chain end to end, including e-procurement for supplier interactions

ShipManager QHSE

Highly configurable QHSE solution covering all aspects of safety and compliance of a modern shipping company

ShipManager Crewing

Full crew management solution including planning, competence management, appraisals and rest hours

ShipManager Hull

Advanced hull integrity solution for hull management utilizing an interactive 3D Digital Twin of your vessel

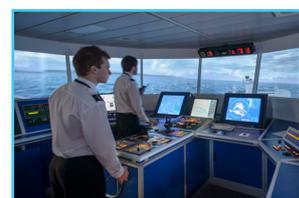

ShipManager Drydock

Supports drydock management and other projects with planning, tendering and project management

ShipManager Interfaces

A selection of standardized interfaces to third party products, including ERP systems

Navigator Port

The master's digital assistant for port clearance, including up-to-date port information and forms, passage planning and rest hours compliance

SHIP OPERATIONS
